

SYNERGI 2018

Synchrotron and NEutron Radiation Go Industrial
New analytical tools for engineering materials science

March 8/9
NEMO
Science Museum
Amsterdam

Energy

Keynote speeches on engineering applications
of neutron and synchrotron facilities:

- Daigo Setoyama, Toyota Central R&D Labs., Inc., JP
- Axel Müller, OHB System AG, DE
- Hjalmar Staf, SANDVIK AB, SE

Business to Research Matchmaking
(in cooperation with Enterprise Europe Network)

Exhibition (research service providers
and research infrastructures)

Detailed programme and registration at:

www.SYNERGI2018.eu

Automotive

Additive
Manufacturing

Metal
industry

Aerospace

Microelectronics

SYNERGI 2018 will demystify Research Infrastructures (RIs) for industry in the field of engineering, energy and microtechnology. Learn how RIs are already working with a wide range of businesses and build with us a future vision of how RIs could be better integrated into the regional and European innovation processes.

SYNERGI 2018 receives funding from the
European Union's Horizon 2020 research
and innovation programme

Europe has the best portfolio of **Advanced Research Infrastructures** (ARIs) worldwide, serving a wide and dynamic academic community of many tens of thousands of scientists every year. These large-scale and unique facilities enable **remarkable insights into materials** of all types, particularly in engineering materials science. The research infrastructures are open not only for fundamental science, but are increasingly becoming a **routine tool exploited for proprietary research** by companies.

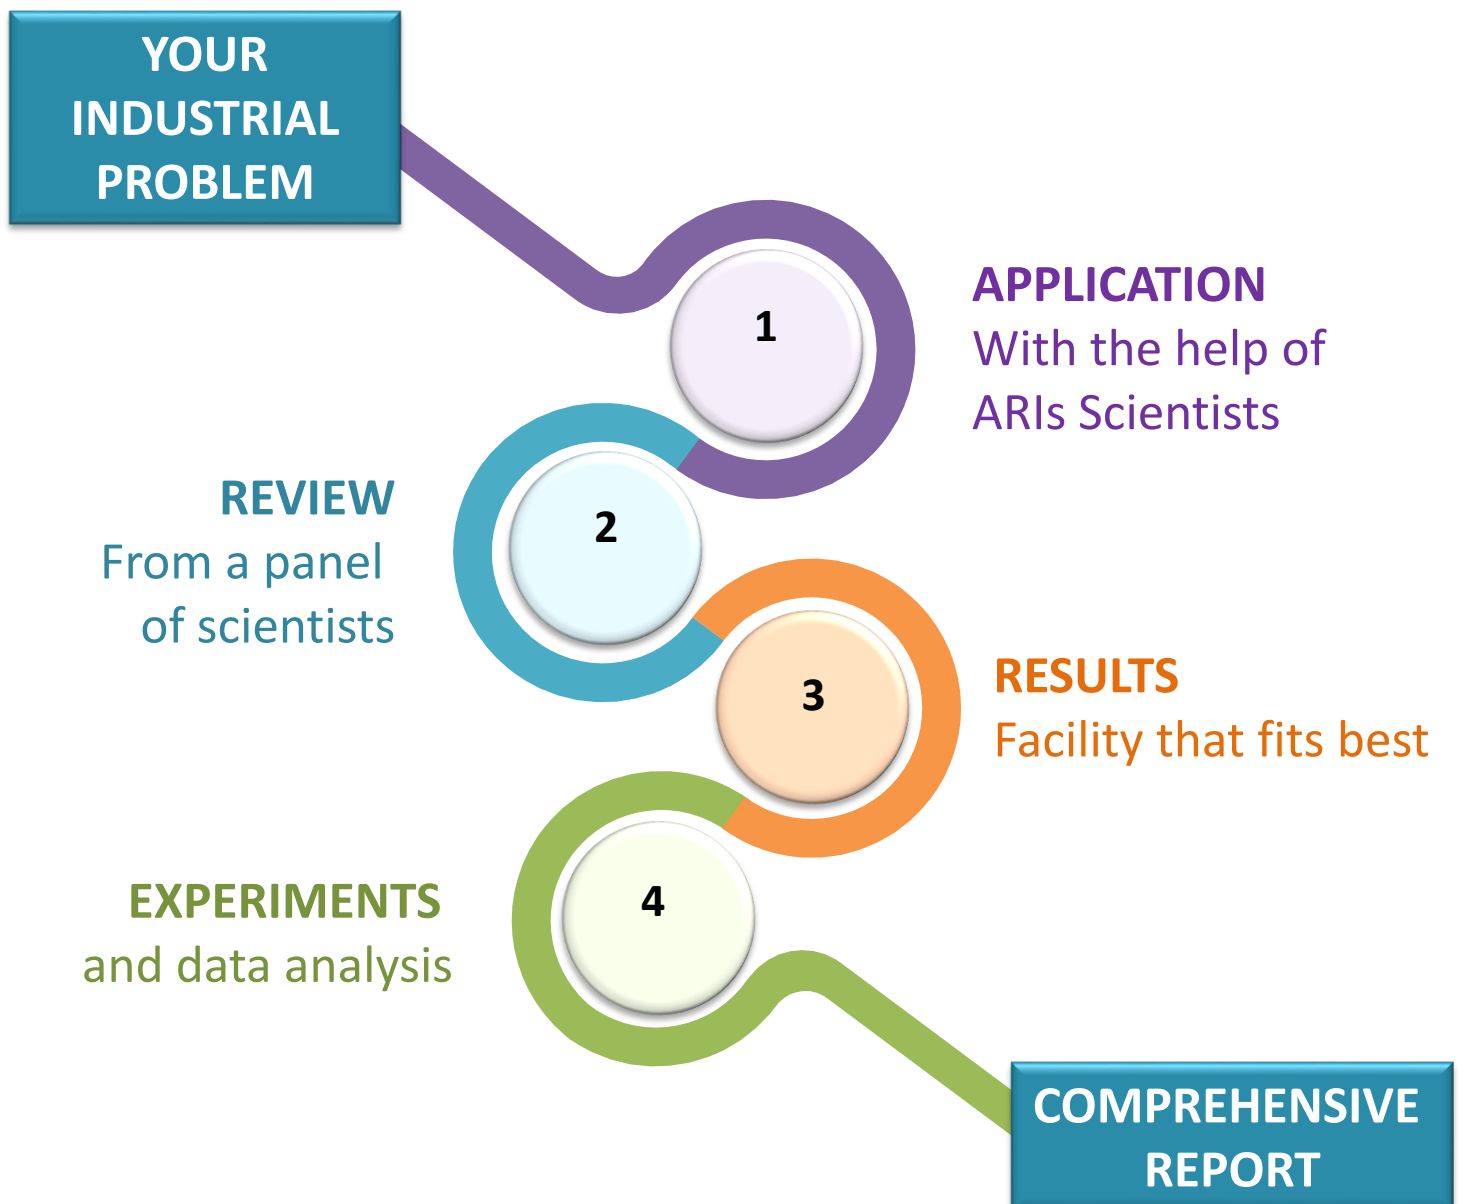

4 good reasons to attend SYNERGI 2018:

- Find out how neutrons and synchrotron light can be tailored to address your needs in the fields of industrial engineering, energy and metallurgy.
- Learn how neutron and synchrotron facilities are already working with a wide range of businesses.
- Discuss your challenges with scientific staff during a business-research matching session.
- Discuss the possibility to perform free feasibility tests via one of our program

A PROBLEM YOU CANNOT SOLVE WITH CONVENTIONAL LAB EQUIPEMENT?

Try **free test measurements or feasibility studies** at one of the best Advanced Research Infrastructures (ARIs) via our program partners
