The team consists of **engineers, chemicals, researchers, environmentalist, business developers and communication experts.**

Sustainable Innovations aim is to improve the return on R&D investments to companies, research centres, public administrations and investors.

We help organizations to promote their innovations into feasible and environmentally friendly business models under **a sustainable and circular economy thinking**

RUR-15-2019: Thematic networks compiling knowledge ready for practice

- To close the research and innovation divide and to act at EU level.
- More intense cooperation is needed between researchers, advisors and farmers/foresters to stimulate the exchange of knowledge in view of fostering economically viable and sustainable agriculture and forestry.
- To increase the flow of practical information between farmers/foresters in Europe in a geographically balanced way, creating spill-overs and taking account of the differences between territories;
- To achieve greater user acceptance of collected solutions and a more intensive dissemination of existing knowledge.

- **RUR-01-2019:** Building modern rural policies on long-term visions and societal engagement
[2019] Building resilient mountain value chains delivering private and public goods (RIA)
- **RUR-04-2019:** Analytical tools and models to support policies related to agriculture and food
B. [2019] Modelling international trade in agri-food products (RIA)
- **RUR-15-2019-2020:** Thematic networks compiling knowledge ready for practice

Others Topics which will need market incursion for new products and their Business implementation.
